

# Lantech Company Overview and Product Solutions/ Technology Presentation

Version 5.1, Feb 2019

# Agenda

1: Lantech Company background

2: Lantech Vertical Markets overview

3: The Major Lantech solutions portfolio

4: Our Value positions

5: Lantech solutions advantages

6: Lantech Wireless and Mobile 4G router product introduction

7: Case study

# Lantech Company Background Milestones

1986~2005

- Setup to promote Novell software in Taiwan
- Focus SMB and Enterprise markets
- Separate Lantech brand and OEM division for commercial switches and routers

2005

- Start Industrial Switch development with Pro-ring topology

2007

- Focus on Industrial Switch+Giga uplinks with PoE surveillance applications

2008~2010

- Build Linux platform for 3,5 series with advanced features and Enhanced G.8032 ring
- Differentiate 2 series with close platform with advanced 3/5 series
- More POE solutions to support 12V/24V applications, like solar panels and car batteries

2011

- Release railway PoE switch solutions with different input range : 24V,72V,110V WV with High PoE budget
- IP67/IP65/IP54/IP41 housing

2014-till now

- New WIFI /Mobile routers for Railway and industrial applications
- Load balancing + TWDP & TWCC technology

# Major Lantech Markets

## City Surveillance

- Public Safety
- Traffic Control
- City Building

## Railway Trains and Metro

- Passenger WIFI
- Infotainment
- PIS
- Intercom
- CCTV

## Vehicle and Bus

- Ticketing, CCTV
- Passenger WIFI
- Route info
- Multi-media

## Highway and Tunnel

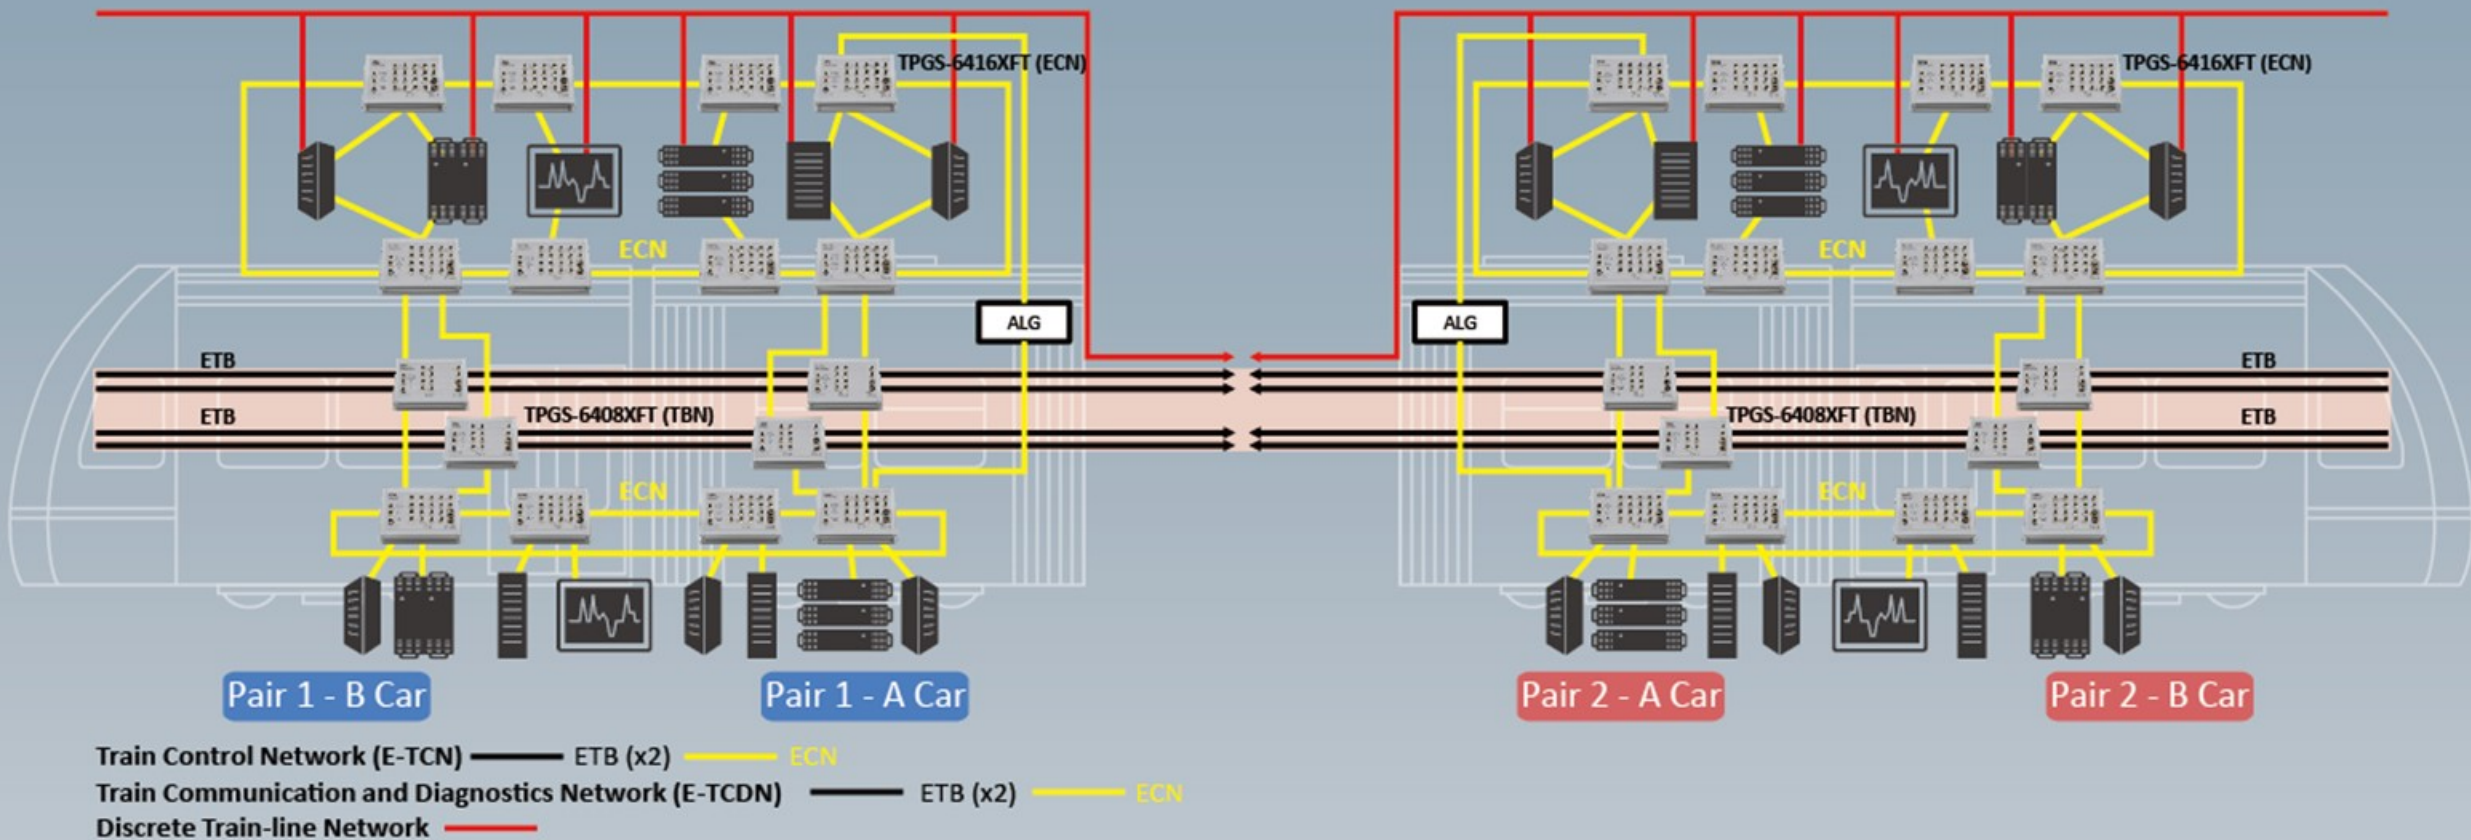

- CCTV
- Traffic and lane signaling control
- Emergency phone
- Light and ventilation

## IoT

- Pipeline
- Aquaculture
- Traffic light

# Onboard/Trackside Communications

Layer 3 Lite (L3L/TBN model)

10G Fiber or Copper Uplinks

Inrush Current Limit

EN 50155:2017, EN 55032, EN 50124, EN 12663, EN 45545-2, IEC 60571 Certified

Up to 80W PoE w/PoE & System Isolation

IEC 61375-3-4 & IEC 61375-2-5 (TBN model)

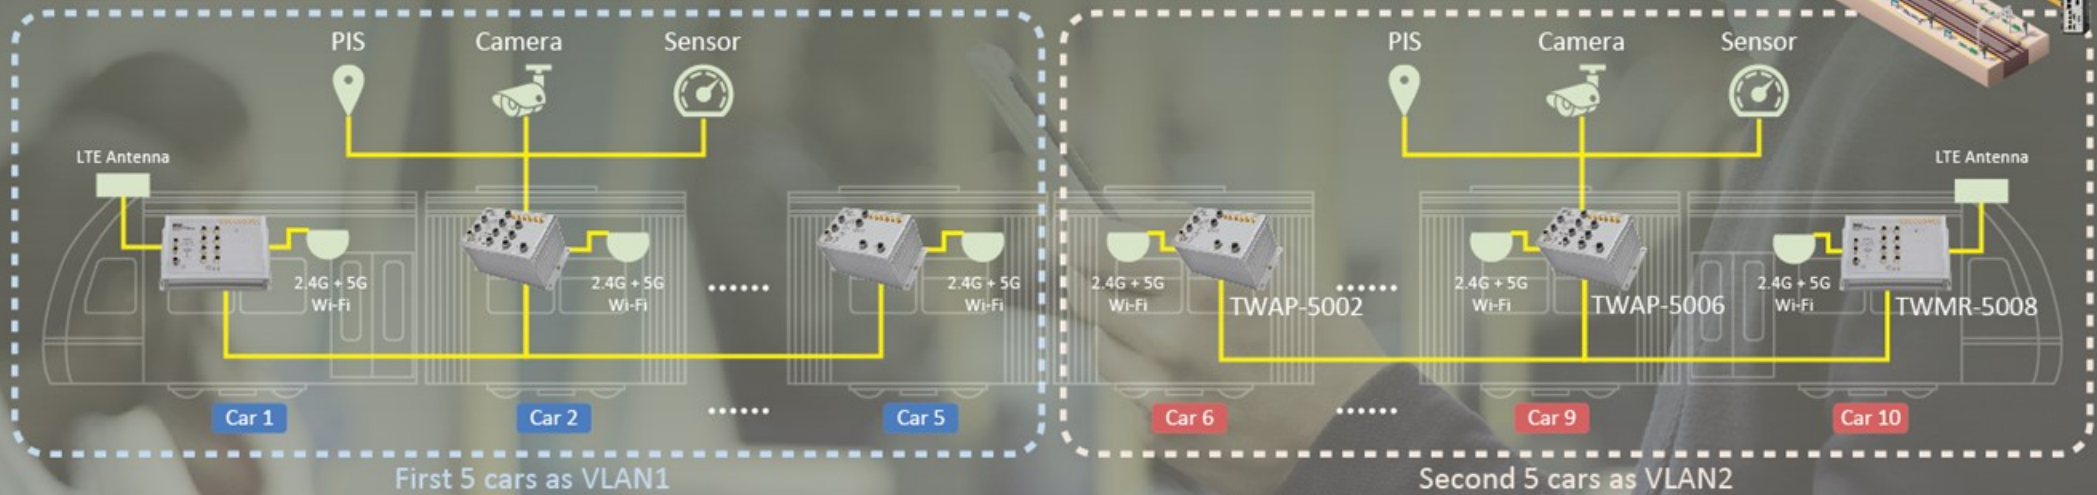

Wide Voltage Input 16.8~137.5VDC

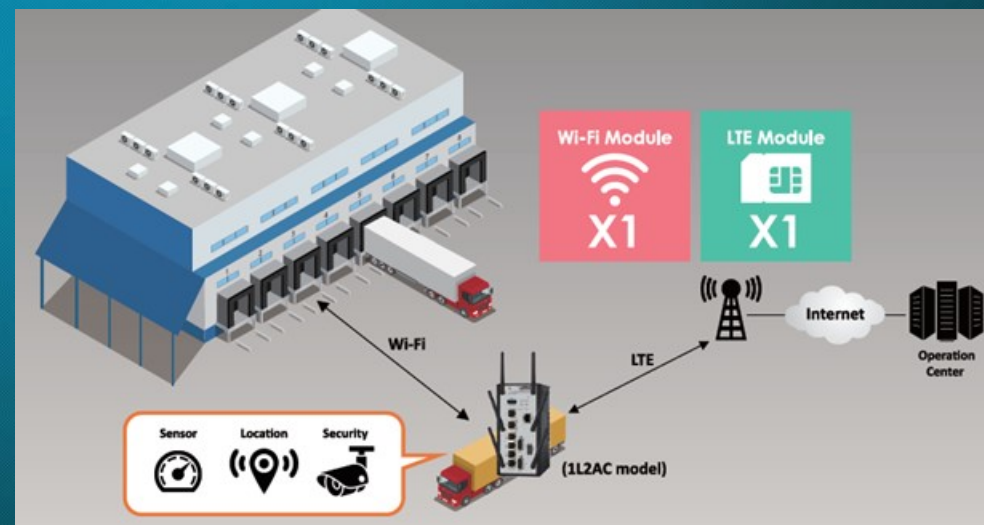

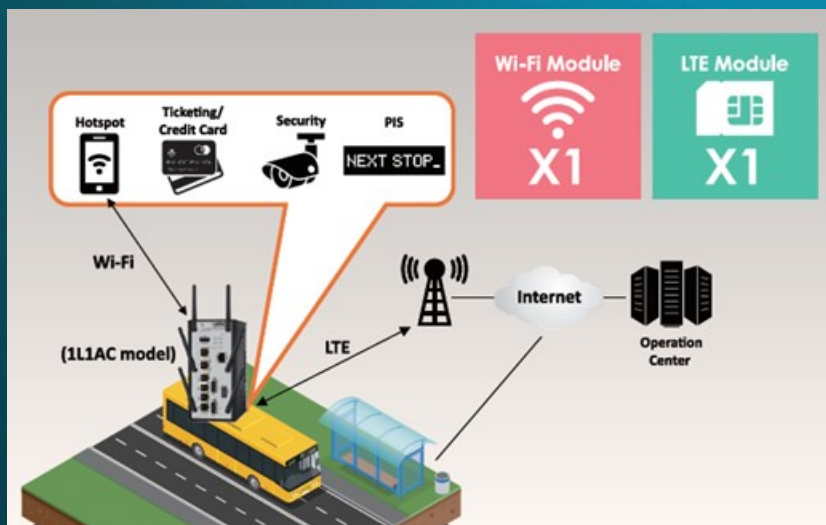

# Onboard/Trackside Communications

- ✓ Two LTE WAN Load Balancing
- ✓ Quad SIM Design
- ✓ LTE & Wi-Fi Redundancy
- ✓ EMMC Flash Storage\*\*
- ✓ eSIM Chip Built-in
- ✓ VPN router for Multi-site VPN, OpenVPN, L2TP, IPSec, L2 over GRE
- ✓ TWCC (Train Wireless Carriage Coupling)
- ✓ Concurrent Dual Band 2.4G+5G Wi-Fi
- ✓ Up to 80W PoE Budget
- ✓ Built-in L2+ Managed Switch Function\*\*

\*\*Optional

# Vehicle Communications

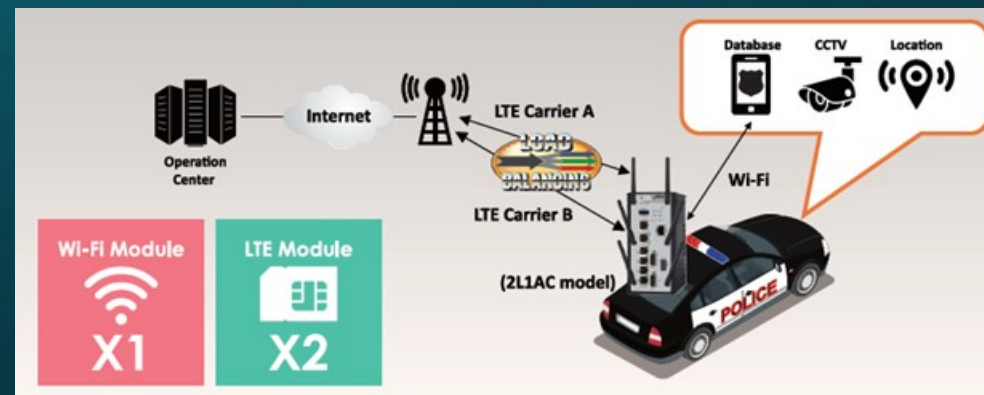

## Features at a glance Lantech Multi-function Routers

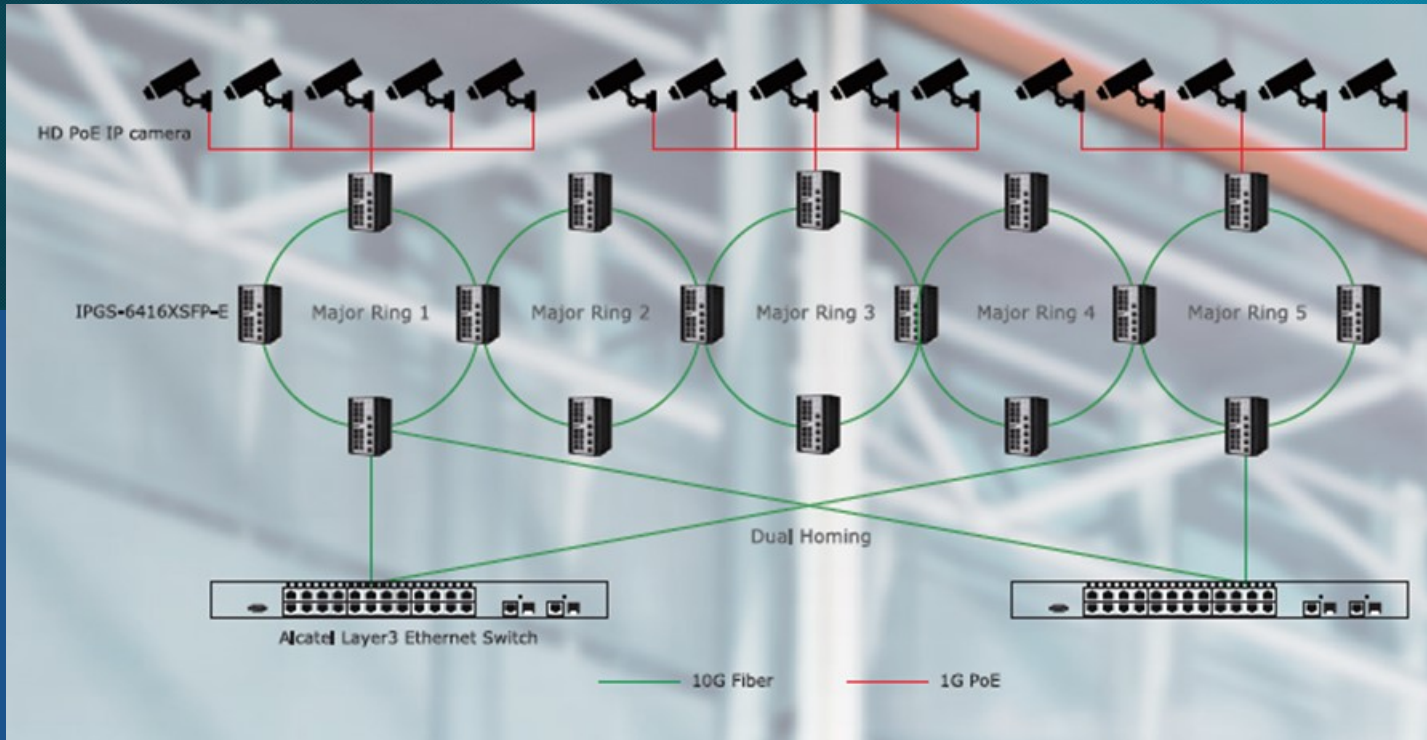

- |                              |                                                                    |
|------------------------------|--------------------------------------------------------------------|
| ✓ Two LTE WAN Load Balancing | ✓ 2 RS422/485 w/isolation or 2 RS232 ports                         |
| ✓ Quad SIM Design            | ✓ Up to 3 Modules (Wi-Fi / LTE module)                             |
| ✓ LTE & Wi-Fi Redundancy     | ✓ Up to 80W PoE Budget                                             |
| ✓ Ignition Sensing Design    | ✓ Supports AP/Bridge /Client modes                                 |
| ✓ EMMC Flash Storage**       | ✓ L2+ Managed Switch Function                                      |
| ✓ eSIM Chip Built-in         | ✓ VPN router for Multi-site VPN, OpenVPN, L2TP, IPSec, L2 over GRE |
- \*\*Optional

## Features at a glance Lantech Ethernet Switches

- |                           |                                    |
|---------------------------|------------------------------------|
| ✓ Ignition Sensing Design | ✓ E-Marking Certified for Vehicle  |
| ✓ 12/24VDC PoE Booster    | ✓ 802.3at Standard, Up To 30W/port |
| ✓ ITxPT Compliant         | ✓ ISO 7637 Certified for Vehicle   |

# IoT Solutions

# Our Value Positions

## Truly Industrial Solution Provider

- EN50155/ E-marking for Railway/Metro/Vehicle
- IEC-61850-3 for Energy market
- DNV for maritime and offshore
- Mining, Oil and Gas.

## Strong POE Product Lines-up

- 5-28port various options
- Full Gigabit with managed and unmanaged options
- 1G, 2.5G, 10G fiber uplink
- Sufficient POE power budget
- Down to 12V/24V booster design for solar panel and battery power source
- 802.3af at ,bt

## Between Wire and Wireless Solution

- Lantech Enhanced ITU Ring
- Link Train discovery protocol (LTDP)
- Train Wireless discovery protocol (TWDP)
- Train Wireless Carriage Coupling (TWCC)
- LTE load balancing technology
- Lantech Air-teaming technology

## Open software platform by Linux

- User friendly UI
- Config with ease
- Tune up easily
- Easy to expand

## Customization Service

- Networking Compatibility issue
- Software customization
- Special requests case by case

## Passed various tests

\*EMI, EMS, EFT, ESD safety testing standards may vary by model

**EN55032** = protection to the radio spectrum & radio service without debilitating interference.

**EN55024** = include Electrostatic Discharges (ESD), Electrical Fast Transients (EFT), Surge, Power Frequency Magnetic Fields, Power interruptions, Radio Frequency Interference (RFI)

**EN61000-4-2** = Electostatic discharge **Contact: ± 4KV ; Air: ± 8KV**

**EN61000-4-3** = Electromagnetic field **80 to 1000 MHz; 10 V/m, 80% AM (1kHz)**

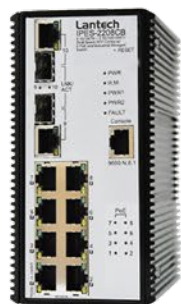

**EN61000-4-4** = Burst / fast transients **± 2KV input DC power ports**

**EN61000-4-5** = Surge / show transient **Line to Line: ± 2KV (DC power port, peak)**

**EN61000-4-6** = Conducted radio frequency **0.15 to 80 MHz; 10V, 80% AM (1kHz)**

**EN61000-4-8** = PF magnetic fiels **50 or 60 Hz; 30 A/m**

EN61000-6-2

# Load Balancing

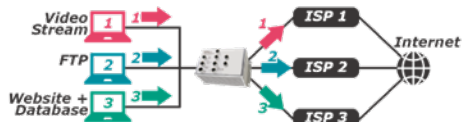

## FULL PACKAGE

## BASIC PACKAGE

### STANDARD

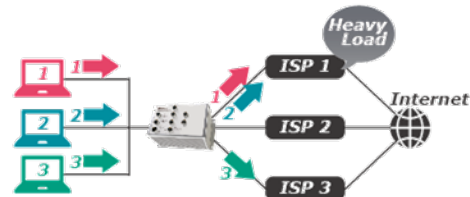

#### Fixed

Manually route by traffic type through fixed WAN link.

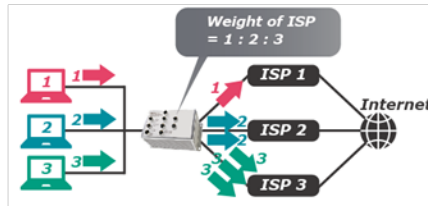

#### Priority

Routes connections through preferred WAN link while others stand-by. Sequentially activate other links if overflow occurs.

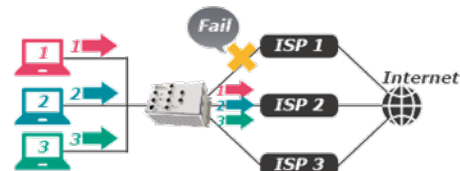

#### Weighted Round-Robin

Evenly distribute the traffic over all working WAN links in circular order according to the specified weights.

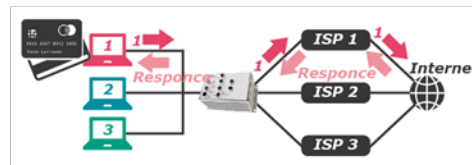

#### Fail Over

Routes connections through preferred WAN link while others stand-by. Sequentially activate another link if preferred link failure occurs.

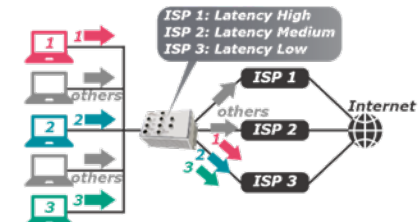

#### Custom Route

Routing through the selected WAN links for each specific traffic, ex: TCP/UDP port number and IP address.

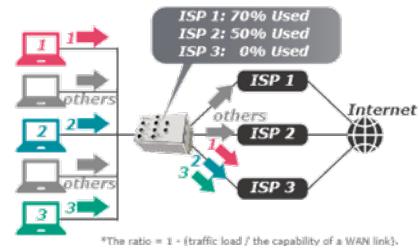

#### Fastest

Routes connections through the WAN link with lowest latency time.

#### Smallest Load

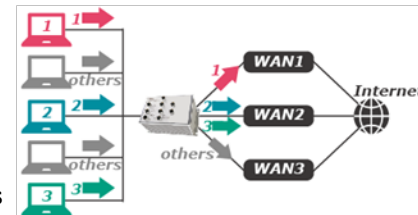

Routes connections through the WAN link with highest free bandwidth ratio\*. The traffic load could be by downstream, upstream or total traffic.

\*The ratio =  $1 - (\text{traffic load} / \text{the capability of a WAN link})$ .

#### Sticky Session

Bind all connections in an application session to particular WAN link. This ensures that all connections in the session are routed to the same WAN link. This is suitable for security services like online payment etc.

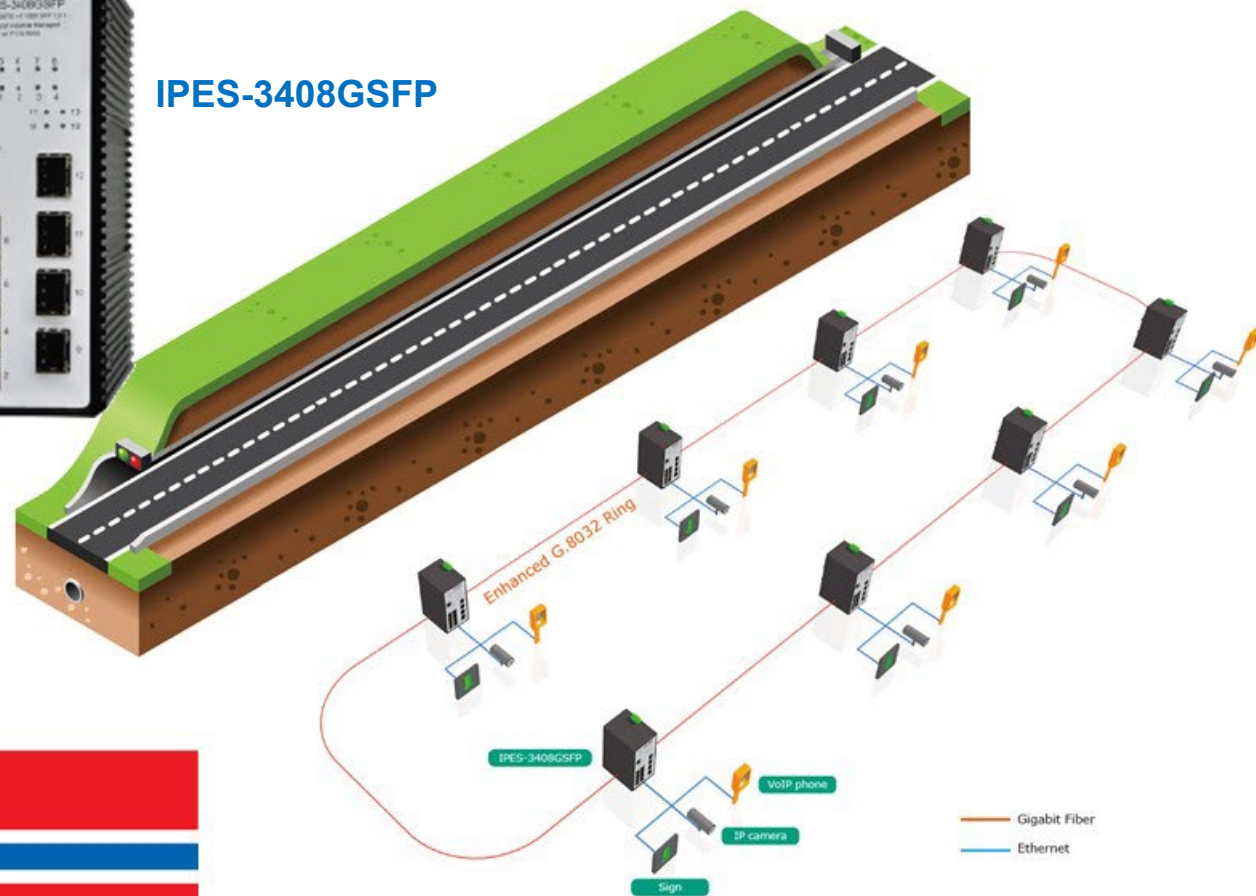

# Lantech™ | CASE STUDIES

# Lantech Industrial Switches are adopted for the longest road tunnel in the world

IPES-3408GSFP

## Project Introduction:

Lærdaal Tunnel is a 24.51 km (15.23 mi) long road tunnel on European route E16 and located approximately 175~200 km (109–124 mi) north-east of Bergen, the second-largest city in Norway

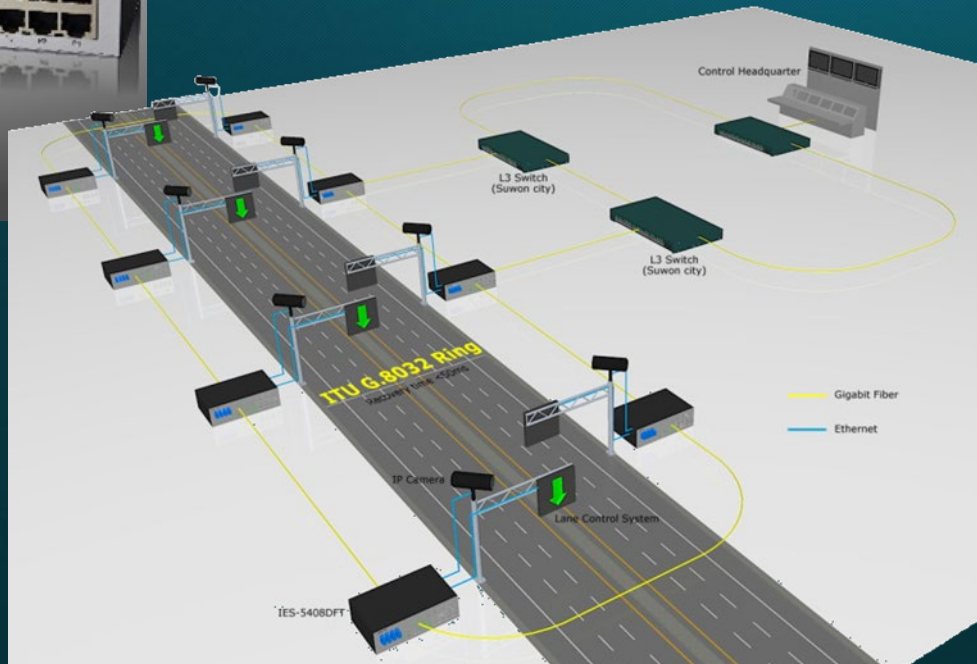

1. Multicast static route for video application
2. Support 8-port PoE+ up to 30W per port
3. Auto Ring for easy configuration for users

# Expressway Lane Control System in South Korea

Gyeongbu Expressway connects Seoul and Busan, the capital and the second largest city of South Korea.

IES-5408DFT  
Customized bypass model

1. Customized bypass model based on IES-5408DFT
2. ITU G.8032 redundant Dual Homing Ring protection
3. DDM SFP is able to monitor the Fiber transmission status remotely.
4. Giga speed fiber and IGMP v3 ensure smooth and real-time HD quality surveillance

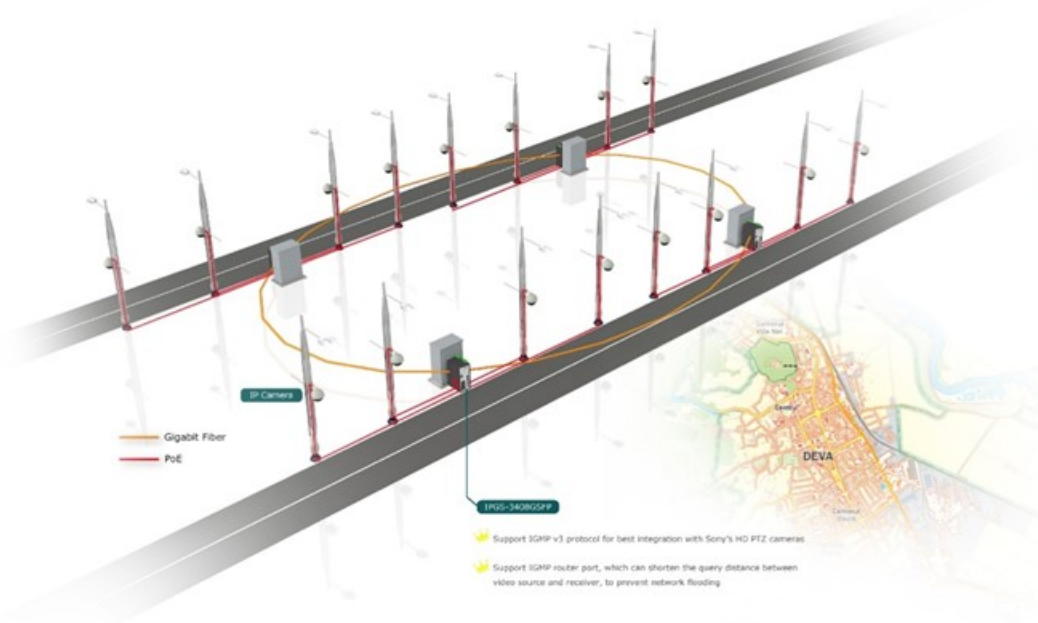

Lantech PoE Switches + Sony IP cameras

# City Surveillance Project in Romania

**Deva, the capital of Hunedoara County, Romania, is a historical city with population of less than 60,000 people (2011).**

1. ITU G.8032 standard Single ring protection, providing recovery time of less than 20ms
2. Supports IGMP router port, which can shorten the query distance between video source and receiver, to prevent network flooding
3. Powerful HW/SW spec with competitive price means the best Cost / Performance

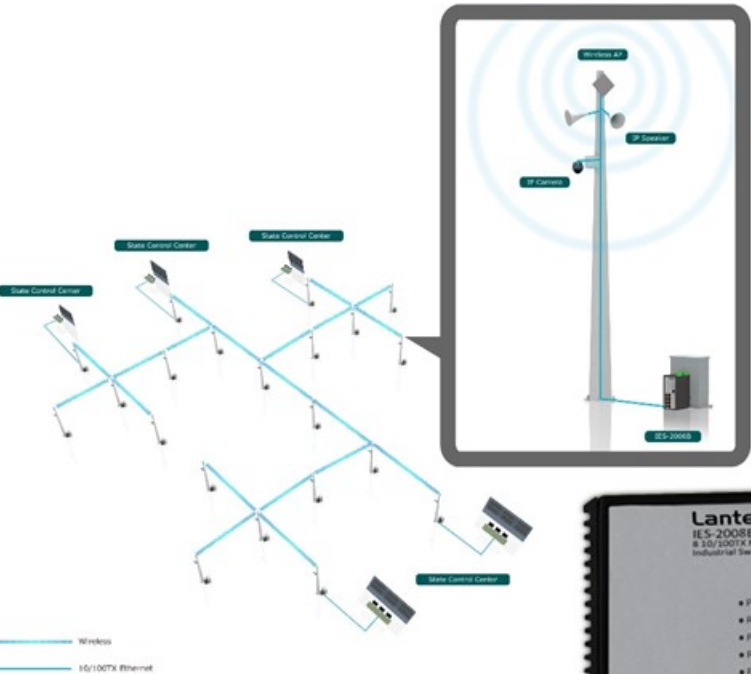

**Lantech™**

# Secure Outdoor Wireless Surveillance System

of 25 City Councils Nationwide in Malaysia

Located in SouthEast Asia, Malaysia consists of 13 States and 3 Federal Territories. -f-Full Wireless City Surveillance System for its 25 City Councils nationwide from East and West Malaysian States

1. Support IGMP snooping, query and source only for multicast IP surveillance
2. Wide operating humidity (up to 95%) – ability to sustain operation in an humid equatorial climates
3. High compatibility with HP management software

Learn more about  
IES-2008B

Lantech™

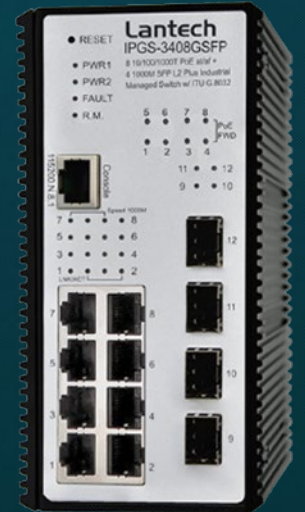

# Success Story: USA

## Loon Project (End user: Google):

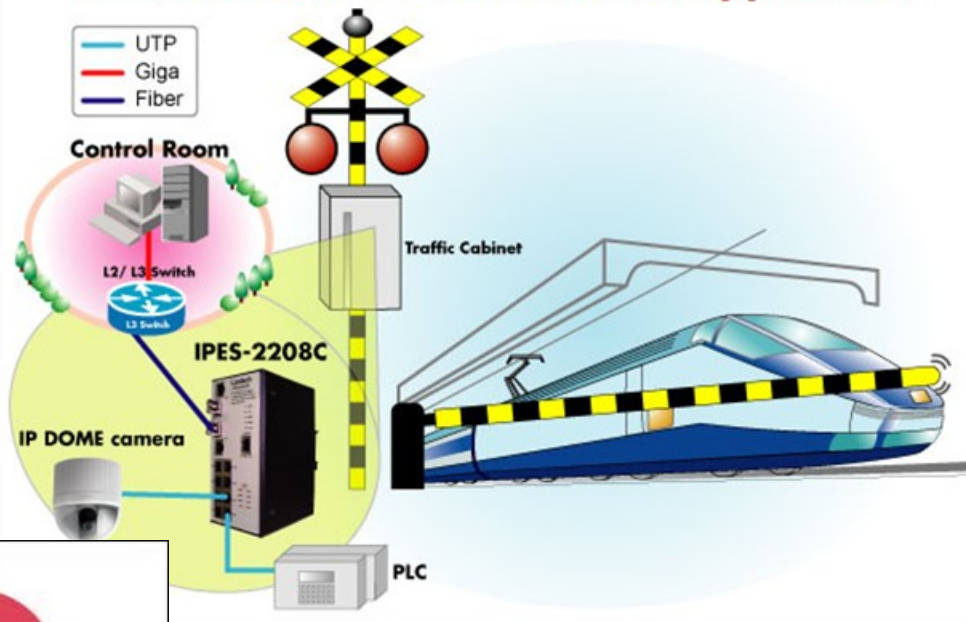

1. Project Loon is an experimental project for suburbs or places with difficulty in building traditional network infrastructure.
  2. Lantech switches are used for: the Communication system, to receive command signals from the control center and send back status reports.
- Model: IPGS-3408GSFP

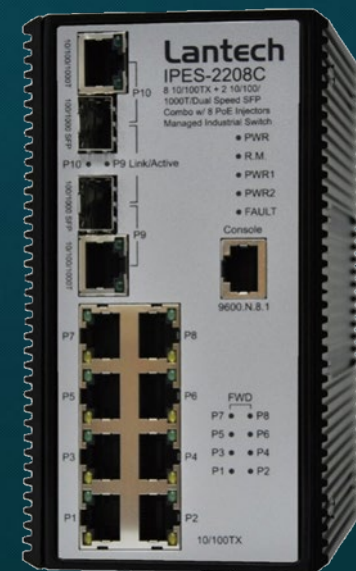

# Railroad Crossing System in Japan

## Japan's Hi-speed railway system use Lantech's IPES-2208C for IP surveillance application

1. Client: JR, one of the most famous railway transportation companies in the world
2. Required extremely high quality
3. Integrated perfectly with NEC's IP cameras
4. Consist of signal control, railway security and train monitor
5. Harsh outdoor environment
6. Adopted 100 units of IPES-2208C

# Success Story: Hong Kong

Highways Department  
The Government of the Hong Kong Special Administrative Region

## Central - Wan Chai Bypass (CWB):

1. The CWB is a strategic road along the north shore of Hong Kong Island targeted to alleviate the traffic congestion along the existing Gloucester Road - Harcourt Road - Connaught Road Central corridor. (length: 4.5KM)
2. Lantech industrial switches are adopted for signaling control system .  
- Model: IES-5408DSFP-E

Lantech™

# Success Story: Chile

## New Wright StreetDeck Bus:

1. The Wright StreetDeck is a double-decker bus manufactured by Wrightbus since 2014. New model with the latest on-board technology is designed for the South American market.
2. A fully connected system including CCTV, PIS, and ticketing are connected with Lantech industrial switch.

- Model: IPES-0008B-12V

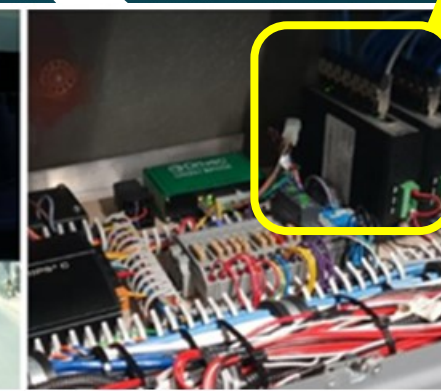

IPES-0008B-12V

# Success Story: Indonesia

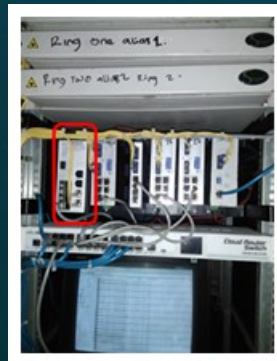

DINAS PERHUBUNGAN KOTA MEDAN  
[HTTP://DISHUB.PEMKOMEDAN.GO.ID](http://dishub.pemkomedan.go.id)

Dinas Perhubungan Komunikasi & Informatika  
Kota Surakarta

## ITS System in Medan City & Surakarta City:

1. Medan is the fourth largest city by population in Indonesia and Surakarta is the birthplace of the current President of Indonesia, Joko Widodo.
2. Lantech industrial Ethernet switches are adopted for ITS system in both cities, installed in the node controllers and control centers.
  - Model: IES-3408GSFP

Lantech™

# Success Story: New Zealand

- 1 Any unauthorized intrusion to the cabinet and switch's DIDO alarm is triggered

IPES-3416DSFP

## Surveillance CMS at Port of Auckland:

Combined Solutions between  
Switches and Surveillance CMS  
- Model: IPES-3416DSFP

- 2 Switch sends notification to Milestone software at remote center

notification

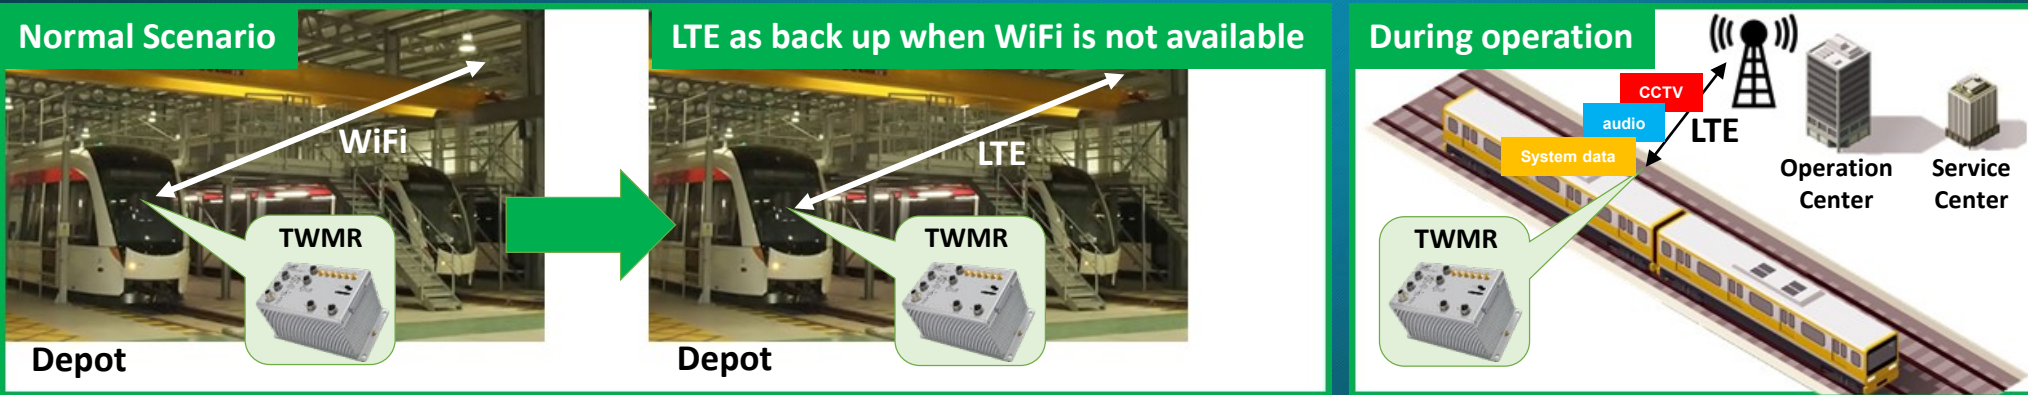

- 3 Cms controls camera to action

Lantech™

# Success Story: Australia

## CCTV, audio, and data transmission project (End user: Sydney Metro):

1. Sydney Metro is a future automated rapid transit system in Sydney, Australia. The first line is planned to consist of 31 stations and 66 km of track. The first stage is under construction and testing and is expected to open in the first half of 2019.
2. During operation, Lantech multi-function routers are used for data transmission of CCTV, audio, system data via LTE. When train is in depot, the data is transmitted via WiFi and LTE will be backup method.

- Model: TWMR-5002-1L-1AC-WV

Lantech™

# Success Story: France

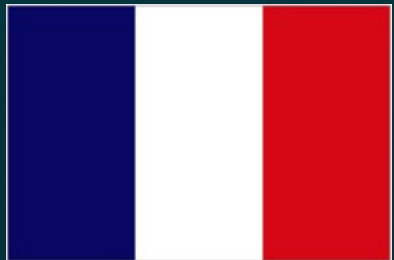

## Wireless Communication project (End user: SNCF):

1. SNCF (Société nationale des chemins de fer français; "National society of French railways" or "French National Railway Company") is France's national state-owned railway company and manages the rail traffic in France and the Principality of Monaco.

2. Lantech switches are used for in-train CCTV, PIS, Wi-Fi hotspot and passenger entertainment system.

- Model: IGS-5408DSFP

# Success Story: Hong Kong

## MTR Project in Hong Kong:

1. The Mass Transit Railway (MTR) is the rapid transit railway system in Hong Kong.
2. Lantech industrial switches are adopted for information TV system on MTR's rolling stock .

- Model: IES-2008B

Lantech™

# Success Story: USA

## Wireless Communication project (End user: SMART RAIL):

1. Smart Rail (SONOMA-MARIN AREA RAIL TRANSIT); is San Francisco Bay Area's newest transportation option for travel, offering passengers rail service in Sonoma and Marin counties.
  2. Lantech switches are used for in-train CCTV, PIS, Wi-Fi hotspot and passenger entertainment system.
- Model: IPES-5408T-43-72V

# Success Story: Malaysia

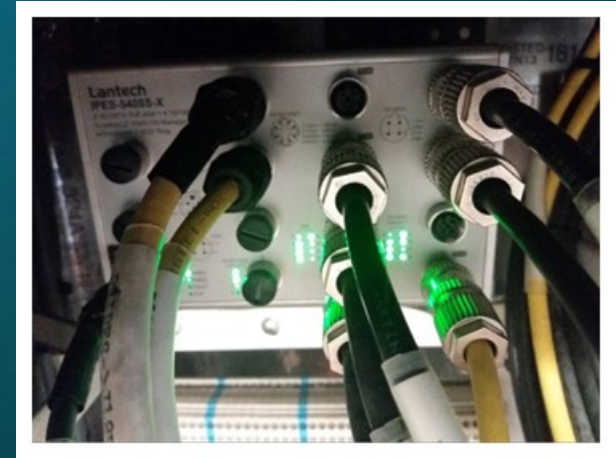

## Bandar Utama-Klang Line Project (End user: Prasarana):

1. The 37-kilometer Bandar Utama–Klang line is a light rapid transit (LRT) line that is slated to be the third LRT system in Klang Valley, Malaysia.

2. Lantech EN50155 switches are installed as CCTV surveillance system for onboard LRT rolling stock.

- Model: IPES-5408S-X-65

Lantech™

# Success Story: Brazil

## CPTM Train Project in São Paulo, Brazil:

1. Brazil held the 2016 Rio Olympic and the country has upgraded their infrastructure in recent years, including the railway system.

- Model: IPES-5408T-67-72V/110V, IPES-5416T-8-67-72V/110V

# Success Story: Vietnam

## **Military Communications (End user: Viettel):**

1. Viettel is a telecommunication service provider in Vietnam that provides mobile networks (GSM 700/800/1000/1200) in Vietnam.
2. With the management of Vietnamese Ministry of Defense, Lantech industrial switches are installed to integrate wireless and modem devices.

- Model: IES-5208DF-67

# Success Story: Netherlands

**Tram project in Amsterdam, Netherlands (End user: GVB):**  
Lantech switches are used in Amsterdam's trams operated by GVB. The tram system consists of 15 tram routes with a total route-length of 80 kilometers.

- Model: IPES-5408T-X-12V

# Success Story: Egypt

## Police car Project in Egypt nationwide (End user: Egypt's Ministry of Interior):

1. Lantech switches are installed in police cars nationwide.
2. The switches are mainly connected to IP cameras inside/outside the police car to monitor the criminals in the car and record the real-time status outside the police car.

- Models: IPES-5408T-X-67-12V, IPES-5408T-X-54-12V

**Lantech**<sup>TM</sup>

# Success Story: Ukraine

## **Metro project in Kiev, Ukraine:**

1. The Kiev metro system has three lines with a total length of 67.65 km (42.04 mi) and 52 stations.
2. The system plans to expand current routes and construct new routes.
3. Lantech switches are installed in stations, connecting the WiFi APs that communicate with trains.
4. Lantech switches also help construct a reliable network between stations and the control center.
  - Models: IGS-5408GSFP, IPES-3408GSFP, IPGS-5400-2P

**Lantech**<sup>TM</sup>

# Success Story: United Kingdom

## **New Caledonian Sleeper trains:**

1. The overnight sleeper train services between London and Scotland, in the United Kingdom.
2. A standalone franchise operated by Serco. In 2017 Serco revealed details of a £150m revamp of the Caledonian Sleeper, with en-suite cabins, double beds, Wi-Fi, charging panels and hotel-style key card entry system.
3. Train developer: CAF ; Estimated operation year: 2018
4. Lantech switches are used for in-train CCTV, PIS, Wi-Fi hotspot and passenger entertainment system.

- Model: IES-5408T-43

**Thank you**
